

We believe in meaningful and effective consultation

The aims of our consultation process are to:

- » Engage early with the local community to facilitate a constructive consultation process to help identify and understand concerns.
- » Assist the local community in understanding the benefits and impacts of the proposed wind farm.
- » Add value and improve the quality of our proposal through meaningful and productive consultation.

The first stage in the consultation process is to submit a Proposal of Application Notice (PAN) to the Local Planning Authority which sets out how we will consult with the local community over our plans. Before we submit a planning application we will create a Pre-Application Consultation (PAC) Report, that documents the community engagement process and any steps we have taken to adapt our proposal.

At this stage we are inviting the local community to submit comments directly to RES. Once an application is submitted there will be the opportunity to submit representations to the Local Planning Authority. Listening to what the local and wider community have to say about our proposals is an integral part of the consultation process and we welcome your comments and suggestions.

We are keen to understand your views on the proposal and the information available at this exhibition. Please take a few minutes to fill out a feedback form with your comments.
