Borgie Mains	Theoretical wind farm visibility (138.5m)
-	1 turbine visible
Lochquo	2 turbines visible
2 All	3 turbines visible
Ha of Durran	4 turbines visible 5 turbines visible
Urran Mains 59	Notes: The ZTV is calculated to turbine tip height (138.5m) from a viewing height of 2m above ground level. The terrain model assumes bare ground. The data for a 45km buffer around the turbines is derived from OS Terrain 5 height data (obtained from EMapSite in July 2022). The data for extents beyond 45km is derived from OS Terrain 50 height data (obtained from Ordnance Survey in July 2019). Earth
	curvature and atmospheric refraction have been taken into account. The ZTV was calculated using ArcMap 10.8.1 software.
